2012 First General-purpose theme published.

# Lightning

By [Hidekazu Ishikawa](#)

2015

The screenshot shows the Lightning WordPress theme homepage. At the top, there's a banner with a photo of a child wearing ski goggles and a snowboard. Below the banner, there's a section titled "Johnijirou On Snow" with the subtitle "Growing up everyday" and a "READ MORE" button. To the left of the main content area, there are three circular icons with text: "For all purposes" (checkmark), "Powerful features" (gear), and "Surprisingly easy" (document). On the right side, there's a search bar and a "Recent Posts" sidebar with links like "Launch of new product!!", "We welcomed a new team member!!", "Marketing convention report!", and "Some post about IT". At the bottom, there's a snippet of a blog post with the title "Launch of new product!!" and a small image.

Theme Lightning published on [wordpress.org](https://wordpress.org)

Thanks to **80,000+** active installs  
Lightning is a very simple & easy to customize theme which is based on the Bootstrap. It is also very friendly with custom post types and custom taxonomies. When you add a new one, the breadcrumbs will be adjusted and posts will look beautifully without editing or adding a template files.

# Business model of theme authors ( Before full site editing )

---

Create and Sale

- ➥ Premium Themes
- ➥ Theme extension plugins
- ➥ Block extension plugins ... etc.

➥ Relatively possible to sell and make money.

# Points where monetization has become more difficult

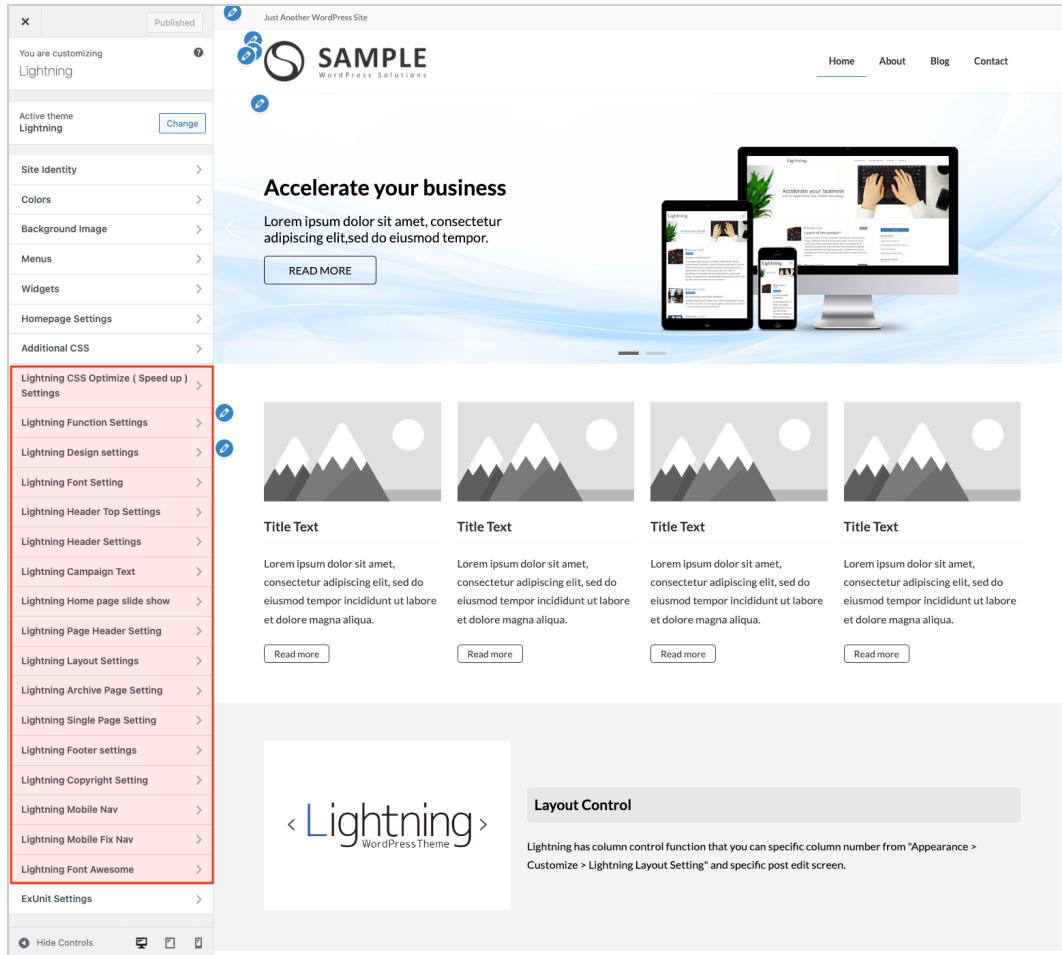

# 01

Traditional monetization points  
become less effective

# Before Full Site Editting

## Selling Premium theme

😊 User

↑ Easily edit    ↓ Reward 💰

😊 Theme authors

# Era of Full Site Editing

---

The entire site can be customized with no code!

- ✍ Header and footer layout
- ✍ Specify color and font size
- ✍ Margin / Padding / Gap settings ...etc

I can do it !

→ **Much less theme dependent.**

**Then as someone  
who made a living out of theme sales...**

# Monetization points disappeared...

(` ;  $w$  ; `)

# A matter of life and death

illilli \_|\_ |○ illilli

## # 02

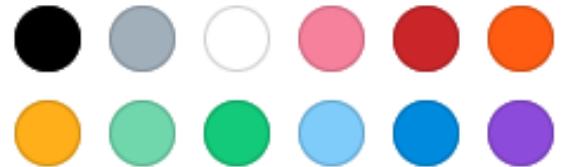

Decreased monetization effect  
by original Block features.

 Group  
A block that groups other blocks.

## Color settings ^

### Text Color

# WordPress version upgrade...

- Advanced layouts are now possible with **Core blocks** and **Block Patterns**.
- The **similar function** is added to the **core blocks**

# Monetization points disappeared...

(` ;  $w$  ; `)

## In addition ...

- Original blocks become an  
**ongoing maintenance burden**
- It became necessary to  
**keep a close watch on Gutenberg's developments.**  
※ to avoid unnecessary development.

# 03

CSS output by WordPress  
became quite complicated

Many theme & custom block developers are facing this issue?

It is inevitable in the evolution of WordPress.

| T – T ) .oO ( I know. I love WordPress... )

The area that theme developers have focused on for monetization is greatly influenced by FSE.

It has become difficult to monetize traditional "theme sales".

# Future direction of theme-related business

# How add value and differentiate?

# Differentiation by block patterns

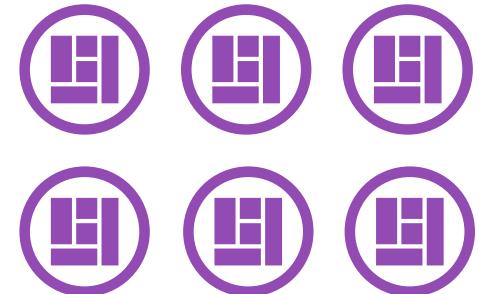

---

## ☞ Easiest way

Includes various block patterns.

There is nothing that users cannot create on their own, so it is **weak as a point of monetization**.

Block Patterns

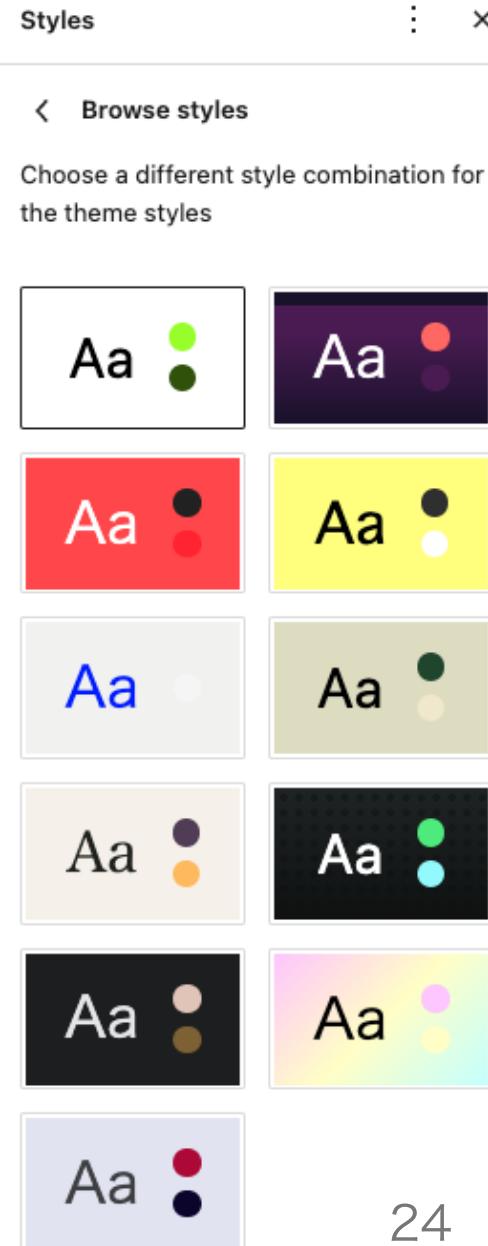

Theme

# Differentiation by Global Styles variations

## 💡 New Easiest way

"Global Styles variations" Feature Introduced in WordPress 6.0

We can create different variations within a single theme.

# Block Patterns / Global Style Variations

Even general users can make it, but...

High quality products created by professional  
→ High added value of course

**New extensibility** and **monetization points**.

# Our case

---

Before FSE

## Theme License Package

- ▀ Theme ( Lightning / Classic / Free )
- ▀ **Theme extension** plugins ( Lightning Pro Unit )
- ▀ **Block extension** plugin ( VK Blocks Pro )
- ▀ Support

- Expected to taper off due to less reliance on the theme
- Even if sell only the pattern, it seems to be difficult because even users have the impression that they can make them on their own
- We have to move to block themes too

## Passport License Package

-  **Theme** ( Classic Theme Lightning / Free )
-  **Theme extension** plugins ( Lightning Pro Unit )
-  **Block extension** plugin ( VK Blocks Pro )
-  Support
-  **Theme** ( Block Theme X-T9 / Free )
-  **Premium Patterns**

This configuration is

- **User can use both**  
**( Classic theme and Block theme )**
- **Keep existing users by the value of the Premium Patterns**

even if the value of the classic theme declines

- **Acquire new users**  
through the value of our Premium Patterns

**Block Patterns is extremely important**

# Publish our own Block Pattern Directory

<https://patterns.vektor-inc.co.jp/>

 Only available in Japanese

Inspired by the Org site:

<https://wordpress.org/patterns/>

The screenshot shows the homepage of the Vektor Pattern Library. At the top, there's a navigation bar with links for Home, Patterns, Usage Methods, My Account, and Log In. A banner at the top right says "Copyable Block Patterns Library". Below the banner, there's a search form with dropdowns for Category (指定なし), Pattern Type (セクション (116)), Product Use (使用プロダクト (指定なし)), and Keyword. There are also filters for "お気に入りで絞り込む" (Only in favorites) and a "View Details" button. The main content area displays a grid of 12 block patterns, each with a preview image, title, product used, category, pattern type, and "View Details" and "Copy" buttons.

The bottom part of the screenshot shows a grid of 12 block patterns, each with a preview image, title, product used, category, pattern type, and "View Details" and "Copy" buttons. The patterns include:

- 目次ブロック\_ビジネス全般\_カスタムCSS 有 (Category: ダミーテキスト, ビジネス全般, ブログ; Pattern Type: セクション)
- フォローCTA (Category: VK Blocks, カスタムCSS; Pattern Type: CTA)
- 広告付き目次ブロック (Category: ブログ; Pattern Type: セクション)
- LINEからのお問合せ (Category: VK Blocks; Pattern Type: CTA, セクション)
- ランチセットメニュー (Category: VK Blocks Pro (有料), カスタムCSS; Pattern Type: メニュー, 参考画像素材)
- サービスの流れ横並び\_ビジネス全般 (Category: VK Blocks Pro (有料); Pattern Type: カラムレイアウト, セクション, 洗濯)

# Why we created our own pattern directory?

## 1. Still difficult only with core blocks

Want to use our original blocks and CSS  
to provide higher quality patterns

! .org allowed **only core blocks** and **can't use Custom CSS**.

## 2. language problem

Characters look different in  
English and double-byte characters

# Pricing table

[Buttons](#) [Columns](#) [Featured](#)[Copy Pattern](#) Add to favorites

Even if it looks not bad in English but...

Default (960px) ▾

## Single

Enrich our growing community.

- General admission and member discounts for one adult

## Family

Support special exhibitions.

- General admission and member discounts for two adults

## Patron

Take support to the next level.

- General admission and member discounts for two adults

# 価格表

[Buttons](#) [Columns](#) [Featured](#)[Copy Pattern](#)

The balance is bad.

Default (960px) ▾

## 個人

成長するコミュニティをサポート。

- 大人1名の一般入場料と会員割引
- 特別展ごとに1枚の無料チケ

## ファミリー

特別展示を支援。

- 大人2名の一般入場料と会員割引
- 特別展ごとに4枚の

## 後援者

次のレベルの支援。

- 大人2名の一般入場料と会員割引
- 特別展ごとに5枚の無料チケ

### **3. Theme style affects**

Even if user paste the .org pattern,  
user need to make adjustments.

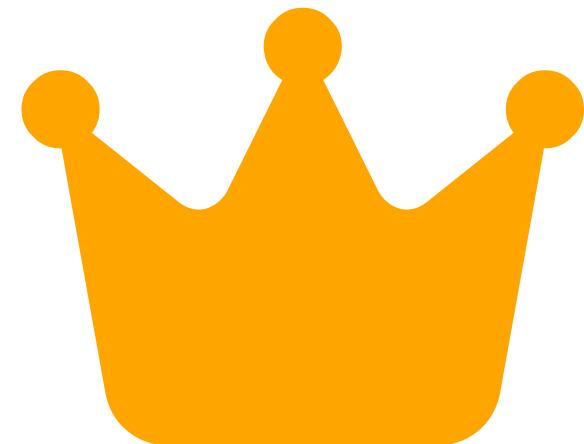

# How to increase product value?

we need to make an effort to  
get users to continue to license  
even if the dependency of the theme decreases.  
( Acquisition of new users )

## 1. Premium patterns

- Available to only paying users
- The design and sample sentences are  
**more elaborate are ready to use.**

# Ready to use?

We provide stylish and common patterns but...

Many **non-professional users**...

- :( **Can't think about page structure** in the first step
- :( **Can't think of the sentences to write**

## **For the End-user ( Business owner )**

Just rewrite the text to suit their business.

## **Commissioned creation**

By using a pattern as a draft of the page,

the **meeting with the client becomes smooth**

# Localization is essential

---

- Must be in the language of the country
- A design optimized for each language (characters/typefaces) is better
- Content and design trends vary by region (country)

## Localized versions

No competition with English-speaking developers.

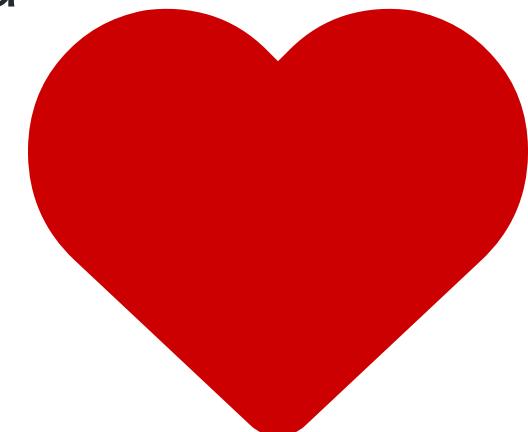

## 2. Favorite pattern registration function

Patterns are added one after another

→ Hard to find

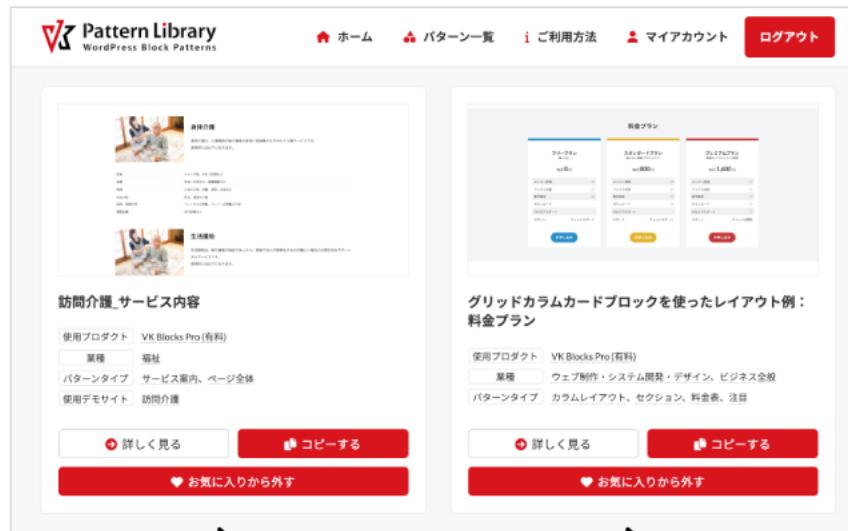

Users to register own favorite patterns and  
**easily recall them.**

※ Same functionality as wordpress.org

# 3. Link function for favorite registered patterns

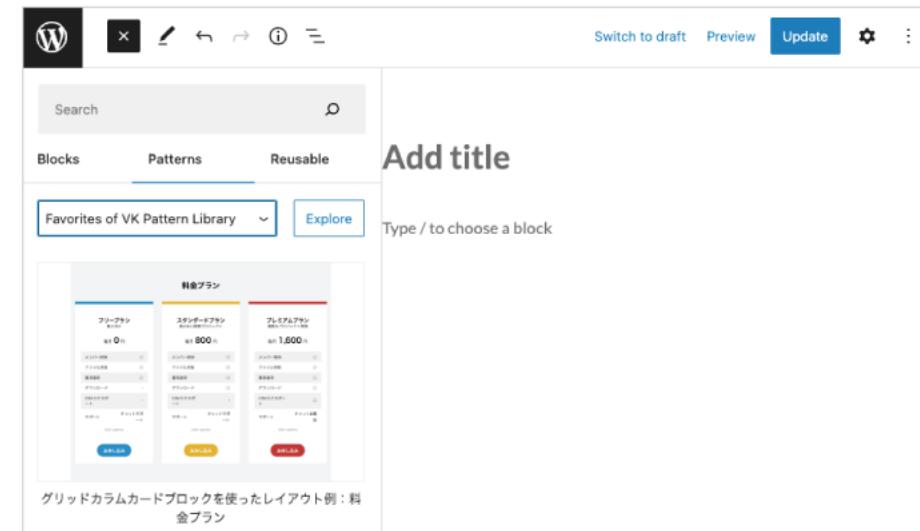

## Pattern library

Add to Favorites

API  
↔

## User's WordPress

Users can use it directly from the edit screen of their site

# Is the theme business dead?

# Theme is important after all

---

Themes and patterns are closely related to the global styles

Bring in a partial pattern from outside and use it  
→ Problem with the uniformity of the design.

**The importance of the theme is high.**

# Users need good themes and highly practical patterns

---

FSE is highly configurable and customizable but...

→ **Too much configuration work**

It's **quite cumbersome** to make from scratch

**Know how to use**

**Can create designs**

**Same for WordPress**

# Responsive design compatibility

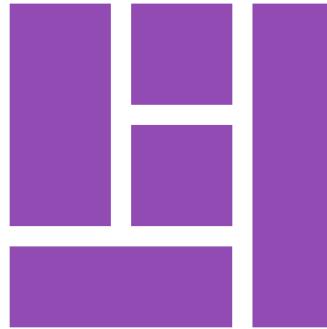

---

How to control display elements according to screen size?

- With a single screen width,  
it might be possible to lay out well somehow.
- **Layout on multiple widths are actually not that easy**

It will be difficult to monetize the theme alone, but...

A set with a **Value-added patterns** are  
there will be **many business opportunities**.

**Value-added  
Patterns**

# At the end

---

What do you think about future theme business?
